

MR. PAUL ICT ACADEMY

HOLIDAY WORK – SCENARIO-BASED ITEM (UNEB FORMAT)

SENIOR ONE – INFORMATION AND COMMUNICATION TECHNOLOGY (O-LEVEL)

Topic: Computer Hardware and System Startup

Instructions:

- Read the scenario carefully before answering.
- Answer in full, applying what you have learnt in class to the real-world situation described.
- Write your work neatly (or type it) and keep it safe to hand in on the first day of next term.
- If you get stuck, message Mr. Paul on WhatsApp for help.

ITEM

Namaganda Rachel's family recently bought a new desktop computer for home use, to help her and her siblings with school work. When the computer arrived, her younger brother Mukisa wanted to set it up and switch it on immediately, but he did not know which cables and hardware components needed to be connected first, in which order, or what would happen inside the computer from the time it is switched on up to when the desktop screen appears.

Mukisa has asked Namaganda, who studies ICT, to guide him.

Task:

- a) Identify the hardware components Mukisa needs to connect before switching on the computer, and explain the correct order and precautions to take while connecting them.
- b) Explain, in the correct order, what happens in the computer from the moment it is switched on up to when the desktop is displayed.

END
