

MR. PAUL ICT ACADEMY

HOLIDAY WORK – SCENARIO-BASED ITEM (UNEB FORMAT)

SENIOR TWO – INFORMATION AND COMMUNICATION TECHNOLOGY (O-LEVEL)

Topic: File and Folder Management

Instructions:

- Read the scenario carefully before answering.
- Answer in full, applying what you have learnt in class to the real-world situation described.
- Write your work neatly (or type it) and keep it safe to hand in on the first day of next term.
- If you get stuck, message Mr. Paul on WhatsApp for help.

ITEM

The Entrepreneurship Club at your school has been saving all its documents such as project proposals, budgets, photos of activities, and members' contact lists directly on the desktop of the club computer without any organisation. Recently, one member accidentally saved a new budget file over an old one, deleting important information, and other members have complained that it takes too long to find files they need.

The club patron has asked you, a member who studies ICT, to help organise the computer's files.

Task:

- a) Explain how you would create and organise a logical folder structure on the computer to store the club's different types of files.
- b) Describe the file management practices the club should follow to avoid losing or overwriting files in future.

END
