

MR. PAUL ICT ACADEMY

HOLIDAY WORK – SCENARIO-BASED ITEM (UNEB FORMAT)

SENIOR FIVE – INFORMATION AND COMMUNICATION TECHNOLOGY (A-LEVEL)

Topic: Computer Software

Instructions:

- Read the scenario carefully before answering.
- Answer in full, applying what you have learnt in class to the real-world situation described.
- Write your work neatly (or type it) and keep it safe to hand in on the first day of next term.
- If you get stuck, message Mr. Paul on WhatsApp for help.

ITEM

Kagoye & Partners Advocates, a growing law firm, wants to computerise how it manages client documents and case files. During a meeting, the firm's partners disagreed on which software to buy: some suggested paying for well-known licensed software packages, while others suggested using free and open-source alternatives to save money. The firm is also unsure of the legal risks of using unlicensed/pirated copies of software that some staff have already installed on office computers, and how the firm should manage software installation and updates going forward.

The firm has hired you as an ICT consultant to advise them.

Task:

- a) Explain the different categories of software the firm would need for its operations, giving examples and the role of each category.
- b) Advise the firm on the factors to consider when choosing between licensed/proprietary software and free/open-source software, and the risks associated with using pirated software.
- c) Explain the procedure the firm should follow when installing and updating software on its computers.

END
