

MR. PAUL ICT ACADEMY

HOLIDAY WORK – SCENARIO-BASED ITEM (UNEB FORMAT)

SENIOR SIX – INFORMATION AND COMMUNICATION TECHNOLOGY (A-LEVEL)

Topic: AI and Emerging Technologies

Instructions:

- Read the scenario carefully before answering.
- Answer in full, applying what you have learnt in class to the real-world situation described.
- Write your work neatly (or type it) and keep it safe to hand in on the first day of next term.
- If you get stuck, message Mr. Paul on WhatsApp for help.

ITEM

Bunya Creatives is a small digital media startup in Uganda that produces videos, graphics and social media content for local businesses. To keep up with growing demand and reduce production time, the founder wants to start using Artificial Intelligence (AI) tools for tasks such as generating video scripts, editing videos, creating graphics/images, and voice-overs.

However, some team members are worried about the accuracy of AI-generated content, possible copyright/ownership issues, the risk of misinformation or deepfakes, and whether relying on AI could reduce the team's creativity or put some jobs at risk.

The founder has asked you, a Senior Six ICT student who has studied AI and emerging technologies, to advise the team.

Task:

- a) Explain how Bunya Creatives can use AI and other emerging technologies to improve its content creation process, giving specific examples of tools/technologies for each stage of production mentioned.
- b) Discuss the ethical, legal and social concerns the team should consider when using AI in content creation, and how each concern can be addressed.
- c) Explain the possible future implications (opportunities and risks) of increased use of AI in the content creation industry.
